Abstract (en)

[origin: CA3057410A1] The invention relates to an animal shoe (1), in particular an orthopaedic shoe for animal feet (2) for the relief of lame cloven-hoofed animals (3), and a shoe base (11) and a kit for such an animal shoe (1). To ensure that the injured regions of lame animals such as cloven-hoofed animals can be relieved inexpensively, safely, quickly and easily, even by untrained persons, the animal shoe (1) according to the invention comprises a shoe base (11), which has an outsole (13) and an insole (14) lying opposite the outsole (13), and also a fastening shaft (12) which is individually adaptable to the animal foot (2) and is used for fixing to the animal foot (2). The shoe base (11) according to the invention comprises an outsole (13), which is made of a closed-pore foam (18), and an insole (14) lying opposite the outsole (13). The kit according to the invention comprises the shoe base (11) according to the invention and a fastening shaft (12) which is individually adaptable to the animal foot (2) and which has a fastening portion (15) for fixing to the animal foot (2) and an attachment region (16) for connecting to the shoe base (11).
