Abstract (en)

[origin: WO2018115756A1] The invention concerns a shelf for a gondola, comprising a top panel, a front face (23) having an outer front wall (40) and an inner front wall (43) folded on themselves and forming a front fold, a rear face (26) having an outer rear wall (50) and an inner rear wall (53) folded on themselves and forming a rear fold, a first side having at least two walls (70, 72) folded on themselves and forming a first side fold, a second side having at least two walls (60, 62) folded on themselves and forming a second side fold, the front face meeting both the first and second sides via two opposing end portions, at least one of which is folded and arranged against the first side or the second side, and the shelf comprises at least one locking mechanism (34) configured to hold said end portion (58) against the first side or the second side.
