Abstract (en)

[origin: WO2018115324A1] The invention relates to a method for endless production of a coiled hot strip (15) in a casting-rolling integrated plant. The problem to be solved is that of specifying a method by which high-quality hot strip (15) of varying steel qualities can be cost-effectively produced. The method should also be reliable and cause extremely low operating costs. Said problem is solved by a method according to claim 1.
