Abstract (en)

[origin: WO2018114893A1] The invention relates to a power tool (10), in particular a router, having at least one electromotive drive (12) acting on a motor shaft (16), wherein the motor shaft (16) defines, with the electromotive drive (12), a motor axis (18) which is coaxial with the motor shaft (16), and having at least one output shaft (20), wherein the output shaft (20) defines an output axis (26) which is coaxial with the output shaft (20). It is proposed that the motor axis (18) and the output axis (26) be arranged substantially parallel to and at a distance from one another.
