Abstract (en)
[origin: WO2018113980A1] The invention relates to a packaging container (1), by means of which a fluid, gaseous or paste-like medium, particularly a foodstuff, a liquid soap or a toothpaste, is stored for transportation purposes, consisting of: a wall (3), by means of which a cavity (5), separate from an environment (6), is formed in the packaging container (1); at least one opening (7) incorporated in the wall (3); and a first deformable bag (10), which is filled with the medium and is gas and liquid-tight, wherein a second gas and liquid-tight, deformable bag (11) is arranged in the cavity (5), the second bag (11), together with the first bag (10), entirely or at least largely filling the volume of the cavity (5) and the pressure state and/or the volume of the second bag (1) being adjustable as a factor of the pressure state and/or the volume of the first bag (1).
