Abstract (en)

[origin: WO2018114181A1] The invention relates to a method (300) and to a device (110) for evaluating an image and providing the evaluation for a driving assist system (140) of a vehicle (100), comprising a step of capturing (310) the image, a step of determining (320) an operating state of the vehicle (100), a step of evaluating (330) the image by means of at least one image evaluation method, which is selected from at least two possible image evaluation methods depending on the operating state of the vehicle (100), and a step of providing (340) the evaluation of the image as data values for the driving assist system (140).
