Abstract (en)

[origin: WO2019206468A1] The invention relates to a holder device for an electrically operated smoking article. This is equipped with at least one base (3) and at least one receiving portion (5) for the smoking article and/or the individual parts thereof. According to the invention, a holder arm (13, 14, 15) pivotally connected to the base (3) and comprising two joints (14, 15) is provided for three-dimensional adjustment.
