Abstract (en)

A residential security system includes a central security system (30) and a plurality of offline security system components (52,62). Each of the offline security system components (52,62) is directly connected to the central security system (30). At least one door lock (22) includes a mobile credentialing system (180). The central security system (30) includes software configured to automatically authorize an entry in response to receiving an authorized mobile credential from the at least one door lock system (22).
