Abstract (en)
[origin: WO2018122026A1] The invention relates to a device for dispensing a cleaning agent into a dishwasher, comprising a cover element (3) for closing and releasing at least one opening (5) of a store (4) for storing the cleaning agent and/or an operating agent, at least one actuating element (1) being provided which has an actuation path (W) for opening and/or fixing the cover element (3), wherein an accidental opening or unlocking is effectively prevented. According to the invention, this is achieved in that the actuation path (W) is oriented away from the store (4) and transversely to the opening (5).
