Abstract (en)

[origin: WO2018122313A1] The invention relates to ballast (3) for a deep-sea diving belt, said ballast (3) comprising a metal core (4) covered with a coating (5), and means for the assembly thereof to a belt strip. According to the invention, the coating (5) is in the form of an add-on shell consisting of at least one shell part (6, 7) made of a plastic material and held around said metal core (4) by securing means (8).
