Abstract (en)

[origin: WO2018121899A1] The invention relates to a device (10) for dosing and filling powdery filling material (1) into containers (2), having a dosing chamber (42) for receiving a target quantity of filling material (1), and having a compressed air source (25) generating at least one compressed air blast during or after emptying of the filling material (1) out of the dosing chamber (42), wherein the compressed air blast can be introduced into the region of the dosing chamber (42) via at least one compressed air bore (22), and wherein the pressure outlet (21) on the one outlet side for the filling material (1) opens from the side facing away from the dosing chamber (42), above the dosing chamber (42).
