Abstract (en)
[origin: WO2018122542A1] The invention proposes a device (1) for continuous production of coils (23) of wound strips (22). The device (1) comprises means for continuously depositing a protective film (3) onto an adhesive surface of a layer (21), the means for continuously depositing a protective film (3) being connected to means for slitting the layer (21) and the protective film (3) thereof into a plurality of longitudinal strips (22), the slitting means being connected to winding means configured to wind each strip (22) into a coil.
