Abstract (en)
A handle arrangement for a mirror cabinet, which mirror cabinet comprises a frame (3) and one or more mirror doors (2) hinged to it, on which door a handle (1) is installed, the handle having a U-shaped groove (9) for installing onto the edge, preferably onto the bottom edge, of the mirror door (2), and which handle (1) has a handle protrusion (7) for opening and closing the mirror door (2). The invention is implemented in such a way that the handle (1) comprises one injection-molded, two-component plastic part, one of which component parts is softer than the other.
