Abstract (en)

The present invention relates to lyocell fiber, a nonwoven fibrous aggregate containing the same, and a mask pack sheet containing the same. The present invention provides lyocell fiber wherein a monofilament has a cross-section of a flat yarn or a flat yarn having a curvature, a nonwoven fibrous aggregate containing the same, and a mask pack sheet containing the same, thereby exhibiting physical properties that could not be provided in the existing lyocell fiber having a circular cross-section, and thus can afford excellent properties such as excellent bendability for industrial material application, good feel and soft gloss property for clothes or interior applications, and transparency, skin adhesion, absorption, and maintenance of a solvent such as moisture, and a smooth surface feel for a mask pack nonwoven fibrous aggregate application.
