Abstract (en)

[origin: CA3053431A1] The invention relates to a crushing apparatus (1) for crushing material to be crushed, in particular for use in the field of recycling and waste processing, said apparatus comprising at least one crushing roller (2) that can rotate about a rotational axis (3), at least one drive device (4) for driving the crushing roller (2), and a frame (5) for supporting and mounting the crushing roller (2) and the drive device (4). According to the invention, the crushing roller (2) and the drive device (4) form a common assembly connected to at least one damping device (16) which is frictionally and/or elastically mounted in or on the frame (5).
