Abstract (en)
[origin: WO2018127259A1] The invention relates to an accommodating container (10) having an accommodating chamber (20) for accommodating articles (30), and having an outer door (40), which in the open state allows the articles (30) to be introduced into the accommodating container (10) and in the closed state closes off the accommodating container (10) in the outward direction, wherein an inner door (50) is arranged between the accommodating chamber (20) and the outer door (40) and forms, with the outer door (40), an airlock chamber (60), which is located above the accommodating chamber (20), and there is a control device (70) present, which makes it possible for the inner door (50) to be opened exclusively when the outer door (40) is closed and for the outer door (40) to be opened exclusively when the inner door (50) is closed.
