Abstract (en)  
[origin: WO2018127334A1] The invention relates to a method for providing a large amount of cell culture medium (10), in particular for cultivating animal cells, for a large reactor system (12) using disposable components, having the following sequence of steps: a) producing a concentrated media stock solution (32), b) filling the concentrated media stock solution (32) into disposable containers (40), c) transporting the disposable containers (40) filled with media stock solution (32) to the large reactor system (12), d) aseptically connecting the disposable containers (40) to the large reactor system (12) by means of a disposable hose system (26), e) providing the media stock solution (32) by supplying high-purity water (24) and/or additives (44), and f) supplying the provided media stock solution (32) to the large reactor system (12).
