Abstract (en)
[origin: CA3048337A1] The invention relates to a sliding door fitting comprising a carriage (5), which is guided on a guide rail (3) and which is connected to a housing (9) of a retraction device in an articulated manner, wherein the retraction device has at least one, preferably two driver elements (10), which can be moved along guide tracks (12) and which are spaced apart, the one or more driver elements being preloaded into a retraction position by means of at least one force accumulator (25), wherein the housing (9) of the retraction device is preloaded in a direction rotation relative to the carriage (5).
