Abstract (en)
[origin: EP3566591A1] The present invention discloses a product for baking and atomizing, characterized by comprising a baking and atomizing segment and a filter tip segment which are wrapped by common paper, wherein a hollowed segment wrapped by the common paper is disposed between the baking and atomizing segment and the filter tip segment, the baking and atomizing segment is filled with plant fiber adsorbing an atomized object, the filter tip segment is filled with PLA, and a total length of the filter tip segment and the hollowed segment is larger than 30mm. The product for baking and atomizing has the advantages of low cost and good environmental protection.
