Abstract (en)
The invention relates to a container pre-cutting device; comprising a die plate (1) and a punch holder plate (2) provided with upper blades (3) for making an upper precut line (51) in the multilayer material (5) of the containers positioned on the die plate (1); in which the die plate (1) incorporates, in a position in opposition to the upper blades (3), lower blades (4), such that while bringing the punch holder plate (2) closer to the die plate (1) the upper blades (3) and the lower blades (4) define on opposite faces of the multilayer material (5) of the containers an upper precut line (51) and a lower precut line (52).
