Abstract (en)
[origin: CN110469211A] An electronic padlock for a two-wheeled vehicle includes a lock body and a lock bow movable relative to the lock body between a closed position and an open position, where the lock body includes a housing, a locking mechanism, and an electrical unit. An elastic molded part comprising a plurality of receiving parts is inserted into the shell in a shape matching manner, and a plurality of components of the electrical unit are accommodated in the receiving parts in a shape matching manner.
