Abstract (en)
[origin: JP2019198069A] To provide a hearing aid with an electronics frame and an antenna integrated therein.SOLUTION: A hearing aid (100) comprises: a casing (1); a frame (11) inserted in the casing (1), for receiving electrical or electronic assemblies which include a transmitting and/or receiving unit (6) for electromagnetic waves; and an associated antenna (10). The antenna (10) is formed as an integral component of the frame (11), as a stamped bent part or as an insert part made of metal. The antenna (10) includes a first part (40) with two ends (44, 62). The first part extends windingly or is formed as an open loop, and a segment along the extending portion of the first part (40) is formed as a first auxiliary structure (70) having the shape of a closed loop.SELECTED DRAWING: Figure 1
