Abstract (en)

[origin: WO2019192840A1] The invention relates to a securing system (3) for a helmet, comprising a headband (10) having two guide devices (28), and two neck band sections (11, 12) having a respective counter guide device (33) corresponding to one of the two guide devices (28) of the headband (10). Each of the counter guide devices (33) is moveably arranged on the corresponding guide device (28) for shifting the respective neck band sections (11, 12) in relation to the headband (10).
