Abstract (en)
[origin: WO2018132381A1] A system (10) for sports training or game play includes at least two light emitting devices (12) that are positionable at a selected spaced apart distance from one another. The light emitting devices (12) are coupled to a power source (40) and each having at least one electrically powered light source (16, 64, 66) that is powered by the power source (40). A controller (70, 80) remotely and selectively controls the activation and deactivation of the light source (16, 64, 66) of each light emitting device (12).
