Abstract (en)  
[origin: WO2018130908A1] The invention relates to a pad printer (50) having at least one cliché (31), held in a cliché carrier (30), and at least one printing pad (22) for receiving a print image from the at least one cliché (31) held in the cliché carrier (30). According to the invention, in order to create a pad printer (50) which is as compact as possible, on which different printing programs can be run and on which a change from one printing program to another printing program can be carried out simply and quickly, the pad printer (50) is assigned an optical adjustment system (1) which has a cliché-measuring system in the form of a measurement station (45) for measuring the at least one cliché (31) of the pad printer (50). The cliché-measuring system in the form of the measurement station (45) has a stationary camera system (3) having at least one camera which is fixed in position relative to a cliché holder (46) belonging to the cliché-measuring system.
