Abstract (en)

[origin: WO2018130788A1] The invention relates to a motorised vehicle (1) for recycling aggregates, which comprises a chassis (2) and an engine unit (3), and, mounted on the chassis (2), a device for collecting aggregates (7), a crushing chamber (9) supplied with aggregates by the device for collecting aggregates (7), by mechanical collection or by suction, and configured to crush the aggregates and to supply crushed aggregates to an outlet, a mixing device (10) connected to the crushing chamber (9) to receive at least one portion of the crushed aggregates available at the outlet of the crushing chamber (9) and configured to mix these received crushed aggregates with at least one binder so as to produce a mortar, and a distribution channel (12) configured to distribute the produced mortar at the outlet of the mixing device (10).
