Abstract (en)

[origin: WO2018129575A1] The invention relates to a guide system (2) for guiding a movably mounted first furniture part (3a), in particular a first door leaf of a folding door, which is connected in an articulated manner to at least one second furniture part (3b), in particular a second door leaf of a folding door, having a rail assembly (1) which comprises: a guide rail (9) having a longitudinal direction (L) for guiding the furniture parts (3a, 3b), a support (11), which is movably mounted in a direction (Z) extending transversely with respect to the longitudinal direction (L) of the guide rail (9), wherein the support (11) in the mounting position can be moved into a transfer position, in which the support (11) adjoins the guide rail (9) in the longitudinal direction (L), such that a guide device (10) that can be connected to the furniture parts (3a, 3b) and moved along the guide rail (9) can be transferred to and fro between the guide rail (9) and the support (11), wherein the guide system (2) has a pillar (14) connected to the support (11), which is arranged vertically in the mounting position and which, together with the support (11), is movably mounted in the direction (Z) extending transversely with respect to the longitudinal direction (L) of the guide rail (9), wherein the first furniture part (3a) in the mounting position is connected to the guide device (10), and the second furniture part (3b) in the mounting position is movably connected to the pillar (14).
