Abstract (en)

[origin: WO2018130774A1] The invention relates to a method for creating the elements of a large digital display panel, comprising the following steps: – determining (101) a display surface, – splitting (102) said display surface into multiple units, – determining (103) the number and size of the framing uprights of a frame of each unit, – determining (104) the number and the size of the vertical uprights of an internal structure of said units, – determining (105) the number of bars, – determining (106) the number and type of fastening elements, said fastening elements being of the nut-and-bolt type, – creating (107) said framing uprights using an aluminum profile, and – creating (108) the vertical uprights using an aluminum profile, – each profile being chosen from standard parts and, if necessary, cut to the desired dimension.
