Abstract (en)
[origin: EP3569093A1] The present invention relates to a hair curler, which includes a housing and a hair curling device. The housing is configured to be held by a user. A chamber for receiving hair is defined in the housing. An opening communicated with the chamber is formed in the side, opposite to the side that matches a human hand, of the housing. The hair enters or leaves the chamber through the opening. The hair curling device is disposed in the chamber. The hair curler has the advantages of a small size, a simple structure, extremely convenient operation and great humanization.
