Abstract (en)
[origin: EP3569094A1] The invention relates to a cleaning and charging station for an electrically driven device (5). The station comprising an outer housing (1) with a base portion (2) and a gallows structure (3) extending from the base portion (2). The base portion (2) comprises a cleaning chamber (4) for at least partially receiving the electrically driven device (5) and the gallows structure (3) comprises a charging terminal (8) for charging the electrically driven device (5). The station further comprises a circuit board (12) mounted within the housing (1) and connected to the charging terminal (8). The gallows structure (3) is located offset to a vertical center axis (I) of the base portion (2) and is inclined to the vertical center axis (I) in at least two directions.
