Abstract (en)

A people conveyor (2) comprises an endless conveyance band (8) of conveyance elements (4) extending along a closed loop in a conveyance area (8a) between two opposing landing areas (3, 9); an endless handrail belt (6) extending in a closed loop between the landing areas (3, 9) parallel to the conveyance band (8); and at least one handrail belt tensioning mechanism (20). The at least one handrail belt tensioning mechanism (20) includes a guide element (12a) and a remote actuation mechanism (30). The guide element (12a) is configured for guiding a portion of the handrail belt (6) and arranged between the two landing areas (3, 9). The remote actuation mechanism (30) is configured for adjusting the position of the guide element (12a) from a position outside the conveyance area (8a) for tensioning the handrail belt (6).
