Abstract (en)
[origin: WO2018133960A1] The invention relates to a battery system (200) for a vehicle (1), preferably for a industrial truck, comprising: - at least one rechargeable battery (210) for supplying power to at least one vehicle component (2) of the vehicle (1), - a charging component (50) for mechanically (52) and electrically (53) connecting the charge to an external charging device (310) to charge the battery (210) using the charging device (310) in a charging state, - a safety device (60) which is arranged at least partially in the region of the charge component (50) in order to detect the mechanical charge connection of the charge component (50) with the charge device (310) such that the supply of power to the vehicle component (2) can be safely interrupted in the charge state.
