Abstract (en)

[origin: WO2018134252A1] Chain table for a turret of a vessel floating in the sea, wherein said turret is adapted to rotate in a moonpool of said vessel, said chain table comprising a body with a circumferential top edge, a bottom surface and an outer surface extending therebetween around a longitudinal axis of the body, wherein said body is provided with a plurality of connectors arranged along said outer surface and adapted for connecting to an end of an anchor line, wherein said connectors are partitioned into different sets of connectors, each set arranged at a height along said longitudinal axis that differs from the height of the other sets and spaced apart from said bottom surface, wherein said chain table is adapted for sinking to the sea bed and is further adapted for attachment to the turret with its longitudinal axis extending substantially vertically
