Abstract (en)
[origin: WO2018134797A2] The invention relates to the field of specific packaging technology. The invention also relates to a comparatively voluminous container which is suitable to store corrosive, pasteurized or sterilized beverages, wherein the contents of the container can be easily removed by a user. The invention also relates to a container with a filling space (140), a receiving chamber (109) and a pressure chamber (106). The container comprises a container upper side (108), a wall (107), a container base (102) and a pressure chamber base (105). The pressure chamber (106) is formed by the container base (102) and the pressure chamber base (105). The filling chamber (140) is formed by a bag (120a, 120b) that can be filled with a liquid and the bag (120a, 120b) is arranged in the receiving chamber (109). The bag (120a, 120b) can be filled with the liquid such that the liquid is not in direct contact with the container upper side (108), the container wall (107) and also the container base (102).
