Abstract (en)  
[origin: WO2018134468A1] There is provided a method, comprising: receiving, by a receiving device from a transmitting device, a resource allocation for short transmission time interval, sTTI, data, wherein the sTTI data is scheduled according to short transmission time intervals to the receiving device; extracting from the resource allocation an indication on whether or not a resource reservation for regular transmission time intervals needs to be taken into account or not; and decoding the sTTI data at least partly based on the indication.
