Abstract (en)

[origin: CN110528250A] This iron comprises a heating body (13) comprising a vaporization chamber (17) having a bottom wall (19) on which water is intended to flow to produce steam, the heating body (13) comprising an electric heating resistor (15) extending around the periphery of the bottom wall (19). The bottom wall (19) has a domed shape and includes at least one V-shaped rib (24) configured to channel the water flowing over the bottom wall (19) towards the electric heating element (15).
