Abstract (en)

[origin: WO2018138058A1] Fixing device (1) for accommodating ribbon bars, comprising at least one carrying unit (2), which has two longitudinal sides (7) and two transverse sides (6), wherein the fixing device (1) is of modular design and comprises at least one longitudinal-side connecting element (3) and one transverse-side connecting element (4), which can be connected to the carrying unit (2), and wherein the longitudinal-side connecting element (3) is designed to join together at least two carrying units (2) on a respective longitudinal side (7), and the transverse-side connecting element (4) is designed to join together at least two carrying units (2) on a respective transverse side (6), wherein each carrying unit (2) has a front side and a rear side, wherein the front side is covered over substantially by at least one ribbon bar, and wherein the rear side has at least one mount (8), which accommodates the longitudinal-side connecting element (3) and/or the transverse-side connecting element (4), wherein the transverse-side connecting element (4) is accommodated substantially fully in the mounts (8) of two carrying units (2) joined together on a respective transverse side (6).
