Abstract (en)
[origin: WO2018137810A1] The invention relates to a spray applicator comprising a carrier body (22) having a plurality of contact surfaces (27, 28, 29) and comprising at least two nozzle bodies (1), wherein each nozzle body (1) is fastened to one of the contact surfaces (27, 28, 29) and has a spray slit (14) for producing a spray jet (19) fanned out transversely to a center plane (12). The center planes (12) cross each other along a straight line (35), which extends outside of the carrier body (22). The contact surfaces (27, 28, 29) face the straight line (35) and are offset to each other in the direction of the straight line (35).
