Abstract (en)
[origin: WO2018138446A1] The present invention relates to compositions comprising a copolymer comprising at least one segment of a polyolefin and at least one segment of a polyamide, said composition further comprising piperazine pyrophosphate and, optionally, a colouring additive. The present invention also relates to a method for manufacturing said compositions and the use thereof for the manufacture of wire rope coatings, electrical parts such as electrical connectors or electrotechnical housings, thermal protection coatings or sleeves, injection-moulded parts for electronic equipment such as computers and telephones, single-layer or multi-layer tubes, corrugated tubes, preferably for the manufacture of wire rope coatings. Finally, the invention also relates to the electronic, electrical or thermal protection components comprising said composition.
