Abstract (en)

[origin: WO2018137757A1] The present invention relates to a spinning solution which contains or consists of cellulose carbamate and cellulose xanthate and a suitable solvent. The cellulose carbamate and the cellulose xanthate are present in the solvent in dissolved form. The present invention also relates to the production of a shaped body, in particular of a filament, by means of a shaping method, in particular a spinning method, from the aforementioned spinning solution. The invention also relates to a correspondingly produced shaped body, in particular a filament, which contains or consists of cellulose carbamate and cellulose xanthate.
