Abstract (en)

[origin: WO2018137743A1] The invention relates to a building block linkage element comprising at least a first stud (1) and a second stud (2) having longitudinal axis (X, X'), wherein the first stud (1) and the second stud (2) comprises at least one slot (21, 22), wherein at least one link (3) extends between the first stud (1) and the second stud (2) and is rotatably attached to the first stud (1) by means of at least one pivot (19, 20) and to the second stud (2) by means of at least one pivot (19, 20). The building block linkage element is suited for providing building blocks which are useful in the construction of walls.
