Abstract (en)
[origin: WO2018138066A1] The invention relates to a bracket for fastening façade elements of, in particular, suspended, back-ventilated façades, having a wall-fastening section which is designed for mounting the bracket on a building wall, and having a façade-fastening section which is designed for installing carrier or mounting profiles. The façade-fastening section comprises a first connection section which is designed for the horizontal installation of carrier or mounting profiles, and a second connection section which is designed for the vertical installation of carrier or mounting profiles, wherein the second connection section is arranged orthogonally to the first connection section, wherein the first connection section is arranged on a first sheet metal section having a first base surface which is substantially rectangular in design in plan view and wherein the second connection section is arranged on a second sheet metal section having a second base surface which is substantially rectangular in design in plan view, wherein at least one bead and/or at least one moulding is arranged in the first sheet metal section and/or in the second sheet metal section.
