Abstract (en)

[origin: WO2018137787A1] The invention relates to a method for operating a human-machine interface (30) for a vehicle, having a vehicle component, a control unit, and a touch-sensitive surface (32), which is provided on the vehicle component, which method has the following steps: a) a touch at any touch point (46) on the touch-sensitive surface (32) is detected, b) a button (48) is then associated with the touch point (46), by means of which button an input is possible, and a function is associated with the button (48). The invention further relates to a human-machine interface (30).
