Abstract (en)
[origin: WO2018162180A1] The invention relates to an electric contact arrangement having a first phase conductor run (1) and a second phase conductor run (2). The first phase conductor run (1) and the second phase conductor run (2) are electrically conductively connected to each other via a coupling point. The first phase conductor run (1) has a plurality of sub-conductors (1a, 1b, 1c). The second phase conductor run (2) has a plurality of sub-conductors (2a, 2b, 2c). The sub-conductors (1a, 1b, 1c, 2a, 2b, 2c) of the first phase conductor run (1) and of the second phase conductor run (2) are each alternately electrically conductively connected to a contact plate (12).
