Abstract (en)
[origin: CN209153402U] The utility model relates to a hinge for a toilet seat ring assembly, the toilet seat ring assembly comprises a cover and a seat ring, and the hinge comprises a rotary damper for slowing down the descending motion of the cover or the seat ring around the rotation axis of the toilet seat ring assembly; an adapter coaxially coupled with the rotary damper along an axis of rotation; wherein the hinge pin extends into a containing hole formed in the adapter, the fixing base can be installed on the toilet bowl, and the hinge pin is kept on the fixing base. According to the utility model, the outer pipe which at least surrounds the adapter and is provided with the through hole is arranged, and the hinge pin penetrates through the through hole and extends into the accommodating hole of the adapter; the receiving opening of the adapter is also designed as a through-opening and the outer tube has a contact surface which rests on a bearing surface formed on the fastening base. The utility model further relates to a toilet seat assembly. As a result, a stable construction is achieved in a relatively simple construction.
