Abstract (en)

[origin: EP3575033A1] A processing control data acquiring apparatus acquires processing control data for processing an eyeglasses lens. The processing control data acquiring apparatus includes a first shape information acquiring portion that acquires target lens shape information of eyeglasses, a second shape information acquiring portion that acquires facet shape information of a demonstration lens which is faceted, and a processing control data acquiring portion that acquires faceting control data for forming at least one flat surface on a lens surface of the eyeglasses lens based on the target lens shape information and the facet shape information. The second shape information acquiring portion detects the eyeglasses facet shape information from the demonstration lens.
