Abstract (en)

A gun (1) for dispensing LPG comprises a body (2), inside which a duct (4) is realised for supplying the LPG coming from a dispensing device, a head (7) connected to the body (2) and in communication with the duct (4), the head (7) is designed to be coupled with a filler (8) for LPG supply to a motor vehicle and comprises a fixed sleeve (10), a movable sleeve (11) sliding on the outer part of said fixed sleeve (10), coupling means (32) for the filler (8) inserted inside the movable sleeve (11), which comprise shaped levers (33) arranged inside the opening of the head (7); the shaped levers (33) move between two positions: a first position in which the shaped levers (33) allow insertion of the filler (8) inside the opening of the head (7) and a second position in which the levers (33), when the gun (1) is fitted on the filler (8), lock onto the filler (8) itself, causing the coupling between the gun (1) and filler (8).
