Abstract (en)
[origin: US2019371541A1] A circuit breaker lockout apparatus includes a base body having a first section, a second section, and a recess formed between the first and second sections to receive a switch lever of a circuit breaker; a fixing element installed at the first section of the base body and having an actuation section to fix the base body to a switch lever of a circuit breaker received in the recess; and a cover adjustably fastened between a release position and a lockout position at the base body, the actuation section of the fixing element is accessible in the release position and is covered in an inaccessible manner by the cover in the lockout position, and the cover is configured to be fixed to the base body in the lockout position to block an adjustment of the cover from the lockout position into the release position.
