Abstract (en)

[origin: US2018220697A1] A pre-vapor formulation that may be included in an e-vaping device may include a solvent and a solution compound. The solvent may include one or more of propylene glycol and glycerin. The solution compound may include one of a saccharide compound, a salt compound, and a polyethylene compound. The concentration of the solution compound may be between about 0.2% and about 10%.
