Abstract (en)

[origin: WO2018141498A2] The invention relates to a handling device for closing outer base flaps (104) of an outer packaging having fold lines (107) for inner base flaps (103) and outer base flaps (104). Said handling device comprises at least one retaining device (50) for an applied cardboard blank (101), at least one glue application unit and a closing module (10) having at least one closing unit (25) for closing the outer base flaps (104) of an applied cardboard blank (101) retained by the retaining device (50). The closing unit (25) comprises two sliding elements (20) that are movable relative to each other. The invention also relates to a method for closing outer base flaps (104) of an outer packaging.
